

## Paladin Technologies is Hiring!

Due to continued growth, Paladin Technologies is looking to hire several technicians in multiple departments in our Vancouver office.

If you would like to explore a career change, please visit <https://paladintechnologies.com/careers/> to check out our current openings.

Some of the positions available include:

### **Structured Cabling Technician**

You will install and service cabling infrastructure and devices for Data, Audio Visual, and CCTV; this includes pre-wiring, installation, termination, testing, reporting, and labelling per specifications and drawings.

### **Integrated Security Technicians – Installation and Service**

You will be responsible for installing and servicing electronic security systems, including access control, CCTV, and intrusion alarms. Troubleshooting and repair of hardware and software of our integrated systems is also a key component of the job.

If either of these positions sound like the perfect opportunity for you, please head to our website and apply or reach out directly to:
